## H2 Predator Hood Panel

***Congratulations*** on the purchase of your new accessory by Predator Motorsports. As with all products, proper installation is the key to obtaining all of the benefits your accessory is capable of delivering. Please take a few minutes to read through the instructions to identify the components and learn where and how they are used. It is a good idea to start by comparing the parts in your kit with the parts list below. Be sure to take all applicable safety precautions during the installation of this product.

| <u>Parts List</u>      | <u>Quantity</u> | <u>Tools Required</u> |
|------------------------|-----------------|-----------------------|
| Instructions           | 1               | • 10mm wrench         |
| Predator H2 Hood Panel | 1               |                       |
| 2-3/4" rear studs      | 2               |                       |
| 3-3/4" front studs     | 2               |                       |
|                        |                 |                       |

### **INSTRUCTIONS**

#### ***Removal Procedure***

1. Open Hood
2. Remove the 10mm nuts on the back side of the hood holding the hood handles in place. **DO NOT DISCARD NUT/WASHERS**, they will be reused.
3. Remove Stock Hood Panel.

#### ***Installation Procedure***

1. Install Studs into hood panel. The longer studs go into the front holes with the shorter studs into the rear holes.
2. Install Predator Hood Panel onto hood. Install nuts and tighten into place. Tighten all nuts evenly to 7ft/lbs.
